Office Action Summary

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitations in the claims with respect to the ladder when the ladder is not being claimed render the claims indefinite. The phrase "the outer most surface", as set forth in claim 1, lacks antecedent basis. The phrases "the same" as set forth in claim 2, and "the same cross section", as set forth in claim 7, is indefinite. Claim 5 is improper as it does not further limit and positively recited element.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Newman.

Newman shows transverse members 18 and 20, and locking means 60.

Claims 1,2,7, and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wirth.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wirth in view of Peters. Wirth shows the claimed step with the exception of the spring biased lock means. Peters at 38 shows a spring biased lock means. It would have been obvious to one of ordinary skill in the art at the

time the invention was made to provide Wirth with a spring biased lock means for securing his step to a rung of a ladder.
